

Name _____ Period _____

Due Date is 5 days after the Blizzard Bag Day _____

Blizzard Bag #1

Create Your Own Chapter 1 Math Quiz

You are to create your own Chapter 1 Math Quiz. You must set up the quiz sheet like it is an actual quiz.

You are to have 5 ORIGINAL questions using the following criteria.

1. One question must be a multiple-choice question. You must have 4 choices: 1 choice is the actual answer, 2 choices close realistic answers but wrong, and the final answer is fictitious (totally crazy).
2. One question must be a short answer question, a word problem with one part.
3. One question must be an open response question. You must write a word problem with multiple parts.
4. The final two questions can be any type of problem: any of the above types of problems.
5. They must be 1-step, 2-step, multi-step questions, or variables on both sides.
6. On a separate sheet of paper, you must make an answer key. (You must do the quiz.) Be sure to check your answers.

***You may use your notes, homework, class work, or textbook for ideas, but everyone must have their own, unique problems. Remember to include math vocabulary: Inverse Operation, Property of Equality, Combining Like Terms, etc. in your questions, instructions or answer key. Make sure your quiz includes questions from more than one section of Chapter 1.
